## PROJECTS

---

### **Food Munch** ([kanchanfood.ccbp.tech](http://kanchanfood.ccbp.tech))

Developed a responsive website for Food Store where users can see a list of food items, detailed information about a food item and offers.

- Designed page using following HTML structure elements like li, header, article, footer elements and different bootstrap components to show different sections on the website and different bootstrap classes for responsiveness through mobile-first approach.
- Implemented product YouTube videos by using bootstrap embed and model components

**Technologies used:** HTML, CSS and Bootstrap

### **To-dos Application** ([kanchantodo.ccbp.tech](http://kanchantodo.ccbp.tech))

Developed persistent to-do application with CRUD operations to track list of tasks

- Displayed list of to-dos with HTML list elements, styled to-do list using CSS, Bootstrap
- Implemented to-do crud operations by using JavaScript event listeners and updated UI dynamically by using JavaScript DOM operations.
- Used Arrays, Objects, and their methods during to-do list CRUD Operations, persisted to-do list state on page reloads using local storage methods.

**Technologies used:** HTML, CSS, JS, and Bootstrap

### **Jobby App** ([kanchanjobby.ccbp.tech](http://kanchanjobby.ccbp.tech))

Implemented Jobby App where users can log in and can see a list of jobs with search by Job title, filters based on Salary range and Employment type, etc.

- Implemented different pages like Login, Home, Jobs, Job item details using React components, props, state, lists, event handlers, form inputs.
- Authenticating by taking username, password and doing login post HTTP API Call.
- Persisted user login state by keeping jwt token in client storage, sending it in headers of further API calls to authorize the user.
- Implemented different routes for Login, Home, Jobs, Job item details pages by using React Router components Route, Switch, Link.
- Implemented filters and search text by sending them as query parameters to jobs API calls.
- Redirecting to the login page if the user tries to open Home, Jobs, Job item details routes which need authentication by implementing protected Route.

**Technologies used:** *React JS, JS, CSS, Bootstrap, Routing, REST API Calls, Local Storage, JWT Token, Authorization and Authentication*
